

Press release for 29/11/2023

## PoINT "S3-to-Tape" Software for IBM Diamondback Tape Library

Siegen/Denver. With the current version 4.0, the tape-based object storage software PoINT Archival Gateway supports the new IBM Diamondback Tape Library. Numerous interested visitors had the chance to see the solution at SC23 in Denver.

PoINT Archival Gateway and IBM Diamondback at SC23 in Denver

With the help of the S3-to-Tape software PoINT Archival Gateway, the IBM Diamondback Tape Library is seamlessly integrated into the storage infrastructure via the standardized S3 interface. The new PoINT software

allows S3-enabled applications to leverage the impressive features of the new IBM library.

PoINT Archival Gateway 4.0 is particularly characterized by its very good scalability and high performance. The storage software perfectly supports the new IBM Library. IBM Diamondback can be configured with up to 14 LTO-9 drives and 1584 media; this corresponds to an uncompressed data volume of 28.5 PB.

PoINT's object storage software offers an AWS-compatible S3 interface and supports multiple storage classes (flash/disk and tape). Together with IBM Diamondback, users can build an efficient and cyber-resilient on-prem cloud solution. The combination of PoINT software and IBM hardware is also ideal for cloud repatriation, i.e. the retrieval of cloud data back to your own data center.

The joint solution of PoINT Archival Gateway and IBM Diamondback Tape Library enables sustainable and cost-efficient data storage to solve the problems of growing data volumes, rising energy costs and increasing cyberattacks.

**About PoINT:**

PoINT Software & Systems GmbH is specialized in the development and distribution of software products for storage, management and archiving of data. Our data & storage management solutions offer an easy and efficient integration of different storage technologies and systems in consideration of enterprise requirements. PoINT products allow optimized usage of storage systems and help to reduce costs and issues caused by data growth. The software solutions fulfil compliance and archiving requirements and provide independence from storage technologies and vendors.
