

Press Release dated January 15, 2015

PoINT Publisher NG 4.0 Release

Siegen. The new version PoINT Publisher NG 4.0 is now available and offers inter alia an automated extraction of data of CD, DVD or Blu-ray discs by disc publishing systems. Another new function is the „Batch-Writer“-module for the processing of media batches consisting of master discs and blank media as well as support of Windows 8 and 8.1.

By its established product PoINT Publisher NG PoINT Software & Systems GmbH offers a hardware-independent software for professional disc production with integrated label printing. Besides production jobs creating a specified number of copies including printing derived of a master disc, users can create media by the ECR module („Event Controlled Recording“) using simple file copy functions over the network. To fulfill special requirements for a flexible integration into applications a batch interface is available as Software Development Kit (SDK).

The manufacturer has focused its product development on further automation capabilities with disc publishing systems. The result is the “bulk reader” which is integrated in the software and offers comprehensive functions for extracting the contents of CD/DVD/Blu-ray discs in an automated manner on local hard disk or a NAS system. The complete process is logged in detail. Data extracted from media can be stored both as directory structure and as image file.

Furthermore media batches consisting of master discs and blank media can be processed automatically by the new “Batch Writer” module. During job processing PoINT Publisher NG imports data from a master disc and copies the data to all blank media following. The process is repeated on the occurrence of the next master disc.

Besides these improvements the new version covers support for Windows 8 and 8.1 (Pro and Enterprise).

About PoINT

PoINT Software & Systems GmbH is specialized in the development of software products and systems solutions for storage and management of data using all available mass storage technologies like optical, hard disk, tape, cloud and object store. Close collaboration with leading hardware manufacturers enables an early support of innovative storage technologies. Besides these complete solutions PoINT also offers its know-how as Toolkits, which can be easily integrated in other applications by a programming interface. Furthermore PoINT

projects entire storage solutions and provides consultancy with its long-term and versatile experience.

PoINT products are distributed by our partners in more than 25 countries worldwide and have been installed successfully in more than 2 million installations. PoINT customers range from end users expecting a compact and secure solution to large corporations, which meet with our solutions their complex demands by providing the necessary reliability and perfection.
